## [SECUREAUTH] User Guide

# [SECUREAUTH] GATEWAY INTERFACE

# FUNCTIONALITY OF GATEWAY

- Home – directs user to the homepage of our website
- About – redirects to the 'About Us' page where we give an overview of who we are and what we do.
- Services – details the kind of assistance we are able to offer with our level of technology.
- Our Work – gives an insight into the nature of services we can offer , how we will bring them about and the support we can continue providing.
- Contact – the means to get in touch with us.
- Learn More (button) – auto downloads this guide.

# PYUSD PORTAL INITIATIVE

[Create] a digitally signed image to upload as authentication NFT

[Scan] QR Code to make or receive PYUSD payment

[Obtain] Phantom Wallet (No.1 Solana Wallet)

# INITIATIVE OFFERS

- [Create] button – redirects user to a portal to upload image, digitally sign it and download a blob with the digital signature to use as an NFT with digital imprint for product verification. With unique profile, username, wallet address and the digital signature on NFT, a supplier can link these to his/her/their products serial numbers, batches and upload to official website to alert customers on latest authentication method.
- [Scan] button – allows user to scan a payment QR Code for the transaction and be redirected to the payment portal where they can even use their PYUSD stable coin to complete the payment.
- [Obtain] button – redirects user to the Phantom official website where they can download their Phantom Wallet App which they will use as their custody Wallet for the PYUSD and be able to mint authentication NFT using the digitally signed image blob in a simple way in the phantom wallet and deploy it on the Solana block chain.
